

## Speed Bumper

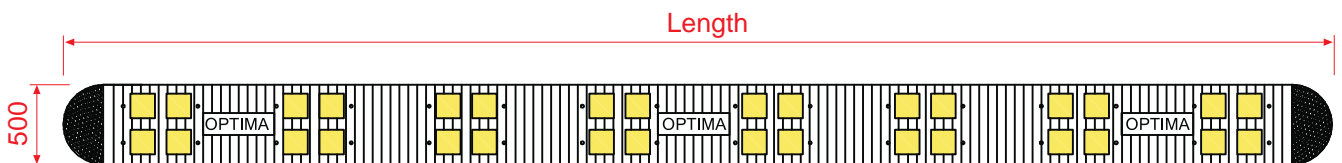

### General Description

Optima Speed Bumpers are designed to reduce vehicle speed to provide a safe transition area for vehicles and pedestrians. The simple modular design allows to make installation in desired length. Each module has yellow strips for better visibility in the dark. With the help of mounting holes of the modules, permanent installation on asphalt or concrete basement is achieved easily.

### SPECIFICATION

|                                 |  |
|---------------------------------|--|
| <b>BODY SIZE</b>                | : 500 x 500 x 45 mm                              |
| <b>HEADER SIZE</b>              | : 500 X 250 X 45 mm                              |
| <b>MATERIAL</b>                 | : Rubber   |
| <b>COLOR</b>                    | : Black, yellow strip                            |
| <b>WEIGHT</b>                   | : 7.75kg (Body) / 2.30kg (Header)                |
| <b>MOUNTING</b>                 | : 10X120MM trifon screw, 14mm rubber fixing plug |
| <b>TENSILE STRENGTH</b>         | : 128 kg/cm <sup>2</sup>                         |
| <b>STRAIN FAILURE</b>           | : 216 %  |
| <b>ENVIRONMENTAL CONDITIONS</b> | : -30 °C and +85 °C                              |
| <b>HARDNESS</b>                 | : 75 ±5 shore                                    |
